

Amendment Dated October 7, 2005
Response to Office Action dated July 8, 2005

Application No. 09/868,695

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. **(Previously Presented)** A computer-readable medium having computer-executable instructions for performing the steps comprising:
 - (a) receiving information indicative of a goal, the goal being associated with a student in a specific task;
 - (b) integrating information that motivates accomplishment of the goal for use in a presentation;
 - (c) managing information flow utilizing a table of components, wherein each component encapsulates behavior and data necessary to support a related set of services; and
 - (d) evaluating progress toward the goal and providing feedback that further motivates accomplishment of the goal.
2. **(Previously Presented)** The computer-readable medium as recited in claim 1, including the step of instantiating a component from the table of components to measure progress toward the goal.
3. **(Previously Presented)** The computer-readable medium as recited in claim 2, including the step of instantiating a component from the table of components to interrupt and interview the student to obtain information to measure progress toward the goal and determine appropriate feedback.
4. **(Previously Presented)** The computer-readable medium as recited in claim 1, including the step of instantiating a component from the table of components to analyze progress and determine appropriate feedback.
5. **(Previously Presented)** The computer-readable medium as recited in claim 1, including the step of instantiating a component from the table of components to evaluate options and present appropriate feedback to assist the student to achieve the goal.
6. **(Previously Presented)** The computer-readable medium as recited in claim 1, including the step of instantiating a component from the table of components to simulate a business application.

Amendment Dated October 7, 2005
Response to Office Action dated July 8, 2005

Application No. 09/868,695

7. **(Previously Presented)** The computer-readable medium as recited in claim 1, including the step of instantiating a component from the table of components to interact with a quantitative analysis model to perform what-if-analysis.

8. **(Previously Presented)** The computer-readable medium as recited in claim 1, including the step of instantiating a component from the table of components to interact with the student utilizing rule-based logic.

9. **(Previously Presented)** The computer-readable medium as recited in claim 1, including the step of instantiating a component from the table of components to present a time based simulation.

10. **(Previously Presented)** An apparatus that creates a presentation, comprising:

- (a) a processor;
- (b) a memory that stores information under control of the processor;
- (c) logic that integrates information that motivates accomplishment of a goal for use in the presentation, the goal being associated with a student in a specific task;
- (d) logic that manages information flow utilizing a table of components wherein each component encapsulates behavior and data necessary to support a related set of services; and
- (e) logic that evaluates progress toward the goal.

11. **(Original)** An apparatus that creates a presentation as recited in claim 10, including logic that instantiates a component from the table of components to measure progress toward the goal.

12. **(Previously Presented)** An apparatus that creates a presentation as recited in claim 10, including logic that instantiates a component from the table of components to interrupt and interview the student to obtain information to measure progress toward the goal and determine appropriate feedback.

13. **(Original)** An apparatus that creates a presentation as recited in claim 10, including logic that instantiates a component from the table of components to analyze progress and determine appropriate feedback.

14. **(Previously Presented)** An apparatus that creates a presentation as recited in claim 10, including logic that instantiates a component from the table of components to evaluate options and present appropriate feedback to assist the student to achieve the goal.

Amendment Dated October 7, 2005
Response to Office Action dated July 8, 2005

Application No. 09/868,695

15. **(Original)** An apparatus that creates a presentation that creates a presentation as recited in claim 10, including logic that instantiates a component from the table of components to simulate a business application.

16. **(Original)** An apparatus that creates a presentation that creates a presentation that creates a presentation as recited in claim 10, including logic that instantiates a component from the table of components to interact with a quantitative analysis model to perform what-if-analysis.

17. **(Previously Presented)** An apparatus that creates a presentation as recited in claim 10, including logic that instantiates a component from the table of components to interact with the student utilizing rule-based logic.

18. **(Previously Presented)** An apparatus that creates a presentation as recited in claim 10, including logic that instantiates a component from the table of components to present a time based simulation.
